

## Fixing Incorrect Scores

Players are allowed to correct scores on their Bridgemate without calling the Director if all four players agree that an error has been made in entering the score and the Round has not been completed.

1. If West hasn't accepted the score, use the CANCEL button to go back to the Result Screen and correct the error
2. If West has accepted the score and then realises that the entry was incorrect, follow these steps;
  - a. Click on the Right Hand Function key under the word 'SCORES';

- b. This will bring up a recap of the boards you have played.

- c. Now click on the Right Hand Function key under the word 'CORREC' and when asked for the board number to correct, enter the board number and press OK
    - d. The board result will be erased
    - e. North can now reenter the correct details for that Board and West can accept it

If the mistake is discovered after the round is completed, call the Director. He will consult with both pairs to ensure there is agreement and correct the result in the Bridgemate Database.
